EDUCATION

Indian Institute of Technology, Bombay | Aug 2022 – May 2026 | GPA: 8.55/10
Major in Chemical Engineering, Minor in Management

PROFESSIONAL EXPERIENCE

Technical Project Manager - Procter & Gamble | May 2026 – Present

- Led capital projects end-to-end on a live manufacturing site, from feasibility and process design through funding, vendor fabrication, installation and startup, using P&G's stage-gated EWP framework
- Ran 2 concurrent capital projects, a new export sachet line and a selenium-based anti-dandruff technology rollout, alongside a plant area revamp, coordinating engineering, operations and external vendors
- Delivered ₹3+ crore in capital projects, owning budget, timeline and technical feasibility
- Designed the wastewater treatment process to remove selenium from plant effluent for ETP scale-up

Founder – MagiLabs (AI Solutions Studio) | Oct 2025 – Mar 2026

- Founded and ran an applied AI studio on a 2-person team, taking AI systems from customer discovery to production for schools and startups and generating $2K+ in early revenue
- Built a computer-vision system that turns live classroom CCTV feeds into teacher engagement metrics from movement and interaction patterns, reaching 90%+ detection reliability on real-world footage
- Shipped an autonomous text-to-video agent that plans, generates and self-reviews its own output through an LLM-as-judge loop; 92% of videos were approved by human reviewers without rewrites

Product Management Intern – Remedo (Healthcare SaaS) | Aug 2025 – Oct 2025

- Built a GTM strategy for ConvertLens by analyzing clinic usage data in SQL, finding that DSOs had 3x higher LTV but 40% lower adoption than solo clinics
- Improved activation by 20% by fixing a 30% drop-off at the "demo-to-trial" stage with a new nurture sequence
- Authored a 5-page PRD (15+ user stories) for "AI Patient Recall", a feature that cut user drop-off by 20%

Product Supply Intern - P&G (Received PPO**)** | May 2025 – Jul 2025

- Spearheaded an internal ML control-logic product (95% prediction accuracy), generating $700K in annualized value by cutting material waste to a record-low 0.4%
- Benchmarked 5+ global sites and partnered with engineering and data science to scope and ship 3 new product features
- Validated a new production system via 30+ A/B tests and live plant trials, ensuring 100% stability and a zero-incident rollout to 50+ operators

Startup Engagement & Partnerships Head | The Entrepreneurship Cell, IIT Bombay | Apr 2024 – Feb 2025

- Built a national entrepreneurship program from scratch with no existing template, reaching 99,000+ students and 3,000+ startups
- Negotiated 4M in partnerships with CBSE, state governments, and 25+ institutions (+33% YoY); built and launched "Seed Stars," a lightweight system connecting 300+ startups with 20+ VCs, helping 5+ startups secure 50L+ in funding

KEY PROJECTS

Modul (Home Automation Prototype) | IDEAS Program, IIT Bombay

- Built a working hardware prototype on a hub-and-node architecture, with ESP32 sensor nodes communicating with a central hub over MQTT
- Developed a decision engine that triggered device actions from sensor context, without explicit user commands
- Implemented accelerometer-based fall detection with automated emergency alerts to caregivers, the core use case for elderly people living alone
- Kept all sensor data processing on the local hub after 50+ user interviews showed privacy was households' top concern

Mumbai Flood Warning System | Climate Studies, IIT Bombay

- Launched a multi-platform (Web, iOS, Android) flood warning system with MCGM, delivering real-time hyperlocal 3-hourly/3-day rainfall forecasts to Mumbai residents
- Distilled the underlying ML models into a simple, user-facing “hyperlocal forecast” feature so residents could act on it without needing to interpret raw data
- Led product-engineering collaboration for a 20+ member team, aligned MCGM and HDFC ERGO, and shipped the MVP across all platforms
